

Head of Product Development for Bioinformatics Software

Intomics offers a challenging and exciting position as Head of Product Development in a leading big data company providing biomedical analysis software products and services to pharmaceutical companies worldwide.

About us

Welcome to Intomics! We dedicatedly support the pharmaceutical industry with highly advanced bioinformatics to assist developing tomorrow's medicines better, faster, and cheaper. We are becoming a preferred collaboration partner for the top pharma and biotech companies, especially those who wish to discover novel biology and disease mechanisms from biomedical big data. One of our data based software achievements has been the development of inBio Map™, a best-in-class product for data interpretation. We are expanding our product portfolio and will increasingly focus on providing SaaS solutions that enable our clients to improve their in-house biomedical data analysis capabilities significantly. This expansion is a key element in our future growth strategy. Would you like to join us and ensure that we will continuously lead the market when it comes to bioinformatics software tools for the pharmaceutical and biotech industry?

Why is Intomics the next exciting step in your career?

Influence the future Intomics is a very successful and rapidly growing Danish company. We are big enough to have a leading role in our key business areas but at the same time small enough to have a very entrepreneurial, innovative and informal atmosphere. We mean it when we say: We would really like you to help us shape Intomics future.

Develop your skills We are proud to say that we have attracted some of the very best bioinformaticians and scientific programmers. Together with a very inspiring and knowledgeable team, you will have the opportunity to bring software-based solutions to the market, that will be game-changers for the pharma industry. And with the strategic focus on this position and Product Development in general this is the perfect role for personal as well as professional development. We make sure our employees share and develop their skills, explore new horizons, and grow their careers on a global scale.

The well-being of our employees is a top priority. We focus on a very good work/life balance, informal contact, celebrating personal and company events and having fun in general.

The Position

As Head of Product Development, you will establish and head a dedicated Product Development Team, and work with management to define the structures and activities of this team. You will influence the development of technical solutions and architecture, and you will be interacting with clients to understand their needs in future versions and new software products. A key aspect of your work will be to grow the Product Development area into a critical strategic area supporting the future growth of Intomics.

You will report directly to the CEO.

The current software products are written in Python and running both on large Linux systems and through web interfaces.

Travelling is expected up to approximately 40 days/yr.

The Candidate

You have a documented background in software development and documented results in successfully heading software development. We are looking for a person with in depth knowledge of software development supporting the journey from specifications over development to deployment, as well as interacting with stakeholders and key end-users at clients' sides. You will have a close collaboration with our strong in-house teams, both technical and commercial. An understanding of biomedical data analysis and the R&D process in pharmaceutical companies is a plus, but not a prerequisite. You must thrive in a dynamic environment typical for young and innovative companies.

The preferred candidate possesses the following qualities:

- Proven experience with software development incl. end-user implementation of solutions, preferably in the life science sector
- Broad experience with developing technical solutions and architecture
- Experience with establishing and managing a team and developing people in a commercial setting
- Ability to navigate through and maintain overview of complex sets of requirements
- Ability to work efficiently in a dynamic and global environment
- Strong communication skills in English at a high level, both orally and in writing

Application

Please send your motivated application, CV and references (in pdf-format) to applications@intomics.com with "*Application-0278 Head of Product Development*" in the subject field **no later than November 26th, 2018**. Applications will be considered on a continuous basis. All relevant interested candidates irrespective of age, gender, race or religion are encouraged to apply. Inquiries about the position can be made to CEO, Thomas Skøt Jensen, tel: +45 88807979
