

Exciting Senior Bioinformatician position available at Intomics

Are you a skilled and experienced bioinformatician with a desire to make a real difference? Do you have experience with analysis and integration of diverse 'omics' data sets using Machine Learning, statistical approaches, or AI? Would you like to work with innovative solutions and world-leading experts and be given a high amount of responsibility? Then you might be Intomics' new senior bioinformatician.

Intomics is specialized in deriving core biological insights from analysis and integration of biomedical big data. Through the use of world-leading expertise, value-added data sets, and a unique systems biology platform, we help the pharmaceutical industry discover new biomarkers and drug targets, improve translational research and realize precision medicine ambitions. We are expanding our bioinformatics specialist team and need a senior bioinformatician with excellent skills in integrative omics analyses and large-scale data mining, that have a strong biological background and good statistical skills. You will work closely with pharmaceutical researchers either on preclinical -or clinical data mining projects with the aim of developing tomorrow's medicine.

Our preferred candidate has the following profile:

- A solid understanding of cell biology and a very strong background in bioinformatics, computational biology or statistical biology.
- 5 to 10 years experience in large-scale data analysis (genomics, transcriptomics, proteomics, metabolomics, epigenetics)
- Strong in statistical pipelines, machine learning, or AI
- Excellent communication and presentation skills
- Skilled in programming, statistical analysis and working in a Linux/Unix environment
- Strong ability to interact professionally with co-workers and clients
- Strong visualization, reporting, and documentation skills

Intomics offer an exciting and challenging job, where you get the opportunity to exploit your skills and qualifications at the forefront of bioinformatics research. You will get to work with pioneering projects in close collaboration with our clients and your colleagues. Intomics A/S offers a competitive salary and a friendly working environment.

Please send your motivated application, CV and references (pdf format recommended) to applications-1902@intomics.com with "Senior Bioinformatician" in the subject field **no later than April 2nd, 2019**.

All interested candidates irrespective of age, gender, race or religion are encouraged to apply. Enquiries about the position can be made to Claus Lundegaard, Senior Bioinformatics Project Manager, tel: +45 88807979.

Intomics A/S, located in Lyngby, North of Copenhagen, Denmark, is a leading bioinformatics company that specializes in providing tailor-made solutions within data mining, bioinformatics and systems biology for the pharmaceutical industry.
