

Full Stack Application Developer at Intomics

Would you like to develop software to improve the lives of millions of patients by discovering the medicine of tomorrow? Do you have experience with web applications and servers? Would you like to work with innovative solutions, world-leading experts and be part of building our next software product? Then you might be Intomics' new Full Stack Application Developer.

Intomics is specialized in analysis and integration of biological big data. We help the pharmaceutical industry discover new drugs, improve research and find the most effective treatments for patients. We are now expanding our software development team with a full stack developer to build a commercial web-based product based on our successful inBio platform.

You will be part of a newly established agile product development team, and will work cooperatively towards solutions using modern technologies. Our software products consist of command line tools, backend web services, and web applications, and you will be expected to have knowledge and interest in development within these domains.

Our preferred candidate has the following profile:

- A software development background and an interest in computer science, software engineering, and natural sciences
- Experience with development of web-based application and (RESTful) services
- Ability to write structured robust code in agile cooperation with other developers
- Experience with Python and with JavaScript applications in modern web browsers
- Practical experience with big data sets, database schemas, and complex data structures
- Experience working in a Linux environment (maybe with large scale data processing)

Among other things, we use Pytest, VueJS, Git, PostgreSQL, Neo4j, Apache, Docker, C, Linux servers and Mac OS clients. Familiarity with these or similar technologies, as well as experience working with bioinformatics or biological data, will be an advantage.

Intomics offers an exciting and challenging job, where you get the opportunity to develop your skills and qualifications, and stay at the forefront of bioinformatics research. Intomics A/S offers a competitive salary and a friendly working environment.

Please send your motivated application, CV and references to applications-1901@intomics.com in pdf no later than Sunday, March 31st.

All interested candidates irrespective of age, gender, race or religion are encouraged to apply.

Enquiries about the position can be made to Head of Product Development, Morten Boll, tel: +45 6126 6626.

Intomics A/S, located in Lyngby, North of Copenhagen, Denmark, is a leading bioinformatics company specializing in providing tailor-made solutions within data mining, bioinformatics and systems biology for the pharmaceutical industry.
